

Able's  
Commitment  
To Excellence

We know that nothing is as important as your team and residents' **safety**. That's why our engineers are often complimented on the quality of our inspections, which include a full safe working load test .

We're not here to simply check boxes, we take the time to ensure that your equipment is providing the **safety** your residents **deserve**.

James, an Able Engineer, completing a full weight test (180kg) against a hoist.

Comprehensive Management,  
Tailored for You

Unique Asset Tagging identifies equipment to provide easy reference when speaking to our team. We'll know exactly to which piece of equipment you're referring and will have access to its history, minimising equipment downtime.

All equipment is clearly labelled after each inspection to show its last inspection date and when it is next due, preventing staff from using any equipment that isn't compliant.

Asset  
Tagging

All equipment is logged into our convenient online portal against its unique Asset ID offering instant access to the equipment's complete history.

“We have always found the Able team very professional, helpful, and well-organised. We'd like to give a particular shout out to Phil, the technician / engineer who has been a consistent friendly face visiting our business to inspect and test our mobility hoists every 6 months. Thank you for all your support and advice.
